ABOUT ME

Aspiring Data Scientist with hands-on experience in machine learning projects, data analysis, and visualization. Skilled in Python, Pandas, and SQL, with strong analytical abilities and a passion for uncovering insights from data.

EDUCATION

Sri Shabramahant Shivacharya Degree collage| 2022-2025

Bachelor of Computer Application (BCA)

Coursework : python, Data Structures, SQL, Web Development, Operating Systems

Skills : Programming, Databases, Data Analysis

Project : Online Auction Management System

Designed and developed a full-stack auction platform using Python (Django), HTML, CSS, and MySQL, implementing a Three-Tier Architecture to replace manual processes, enhance security, and enable virtual selling and bidding. The system features a robust Role-Based Access Control (RBAC) system for Bidders, Sellers, and Administrators, and includes core auction logic such as an automatic auction extension mechanism.

N.V s Polytechnic Gulbarga | 2017-2022

Diploma in Computer Science Engineering

Coursework : C Programming, Java, DBMS, Computer Networks, Operating Systems

Skills : Software Development, Problem-Solving Networking Basics.

Project : Developed a full-stack Classified Job Web Application using PHP, MySQL, WordPress, and HTML/CSS, featuring user, admin, and ads modules with secure data management. The system includes a map-based job search for location filtering and demonstrates end-to-end development skills from database design to front-end interface implementation.
